### **Hunter Knepsield Hex Shelter/Restroom**

*LaGrange, KY* - Hunter Knepsield's Hex Shelter/Restroom was designed with cooperation from Wirth & Associates Landscape Architects, Charlotte, NC., for the Bellingham Park Phase 1 project.

Designed for comfort and accessibility, the shelter can accommodate any small gathering with ease. Steel columns, laminated beams, and Southern Yellow Pine decking add to the overall aesthetics. The restroom is manufactured with Certainteed™ fiber cement lap siding along with engineered wood trim to facilitate ease of maintenance and help deter vandalism.

The restroom interior has continuous laminated FRP with aluminum trim over steel framed fiber cement walls, solid plastic partitions, and rubber flooring for cleaning and maintenance ease.

For more information, contact Hunter Knepsield Company at 800-626-6530 or visit the website at [www.hunterknepsield.com](http://www.hunterknepsield.com).
