Hunter's Trail Combo Restroom/Concession Facility Scores with Fans at Soccer Park

LaGrange, KY - Hunter Knepshield Company recently installed two Hunter's Trail combination restroom/concession modular facilities at Louisville Soccer Park in Louisville, KY to the delight of soccer fans and park management alike.

The soccer park features eight regulation soccer fields and two junior fields and accommodates gatherings of several thousand people during peak weekends. The park was on a fast-track schedule for opening prior to the busy spring soccer season and was searching for a modular building for restrooms and concessions. In addition to fast delivery of the facility, park officials recognized the need to provide attractive, low maintenance facilities for the users and called on Hunter Knepshield Company for a solution.

Completed in only 60 days, the two facilities at the soccer park are part of the Hunter's Trail line of modular restroom facilities from Hunter Knepshield Company. Hunter's Trail facilities include solutions for virtually any situation with fast turnaround and simple site preparation. Pre-manufactured for economy and ease of installation, the Hunter's Trail buildings are pre-plumbed, pre-wired, and shipped complete with concrete floor. Hunter's Trail facilities meet ADA requirements and can also be customized to suit specific needs. Options include additional space for storage, concession facilities, ticket booths, office space, and showers. A variety of plumbing choices are available to match on-site resources including composting toilets for remote sites.

Interiors are designed for low maintenance including wall-to-wall, floor-to-ceiling reinforced fiberglass for easy washdown. Cathedral ceilings with 2x4 skylights create a well lit, non-threatening environment inside the public facilities. In addition, the Hunter's Trail style can be outfitted in a variety of finishes including redwood, cedar T1-11, rough cedar, pine clapboard, stucco, and others to complement the natural surroundings. Hunter Knepshield Company also offers the Desert Trail style featuring a variety of newly available fibercement facings offering strength and durability.

Hunter Knepshield Company has provided innovative, affordable solutions for parks and recreation facilities for 35 years. In addition to modular public restrooms, Hunter Knepshield Company also manufactures pre-fab park shelters featuring clear span ceiling trusses for an open and airy look and feel.
