### **Trail Stop™ Modular Restroom Facility Ideal for Remote Areas with No Available Water or Electricity**

*LaGrange, KY* - Hunter Kneppshield Company introduces the Trail Stop™ modular restroom facility designed for areas where water and electricity are not available such as remote areas on golf courses, parks, and primitive campgrounds.

The Trail Stop facility features a Clivus Multrum™ composting unit with solar powered fans for maximum ventilation inside the composter. A covered porch area provides protection from sudden inclement weather conditions and 2x4 skylights provide daytime lighting and help create a non-threatening environment.

Construction focuses on providing a maintenance friendly facility including the use of treated lumber, continuous reinforced fiberglass wall interiors, and a variety of durable, easy maintenance siding choices. In addition, the Trail Stop unit features a solid composite action floor system covered with rubber flooring for a firm, non-skid surface that is durable and easy to maintain.

Hunter Kneppshield's line of modular restroom facilities include solutions for virtually any situation with fast turnaround and simple site preparation. Pre-manufactured for economy and ease of installation, the buildings are pre-plumbed, pre-wired, and shipped complete - ready for placement. Interiors are designed for low maintenance including wall-to-wall, floor-to-ceiling

reinforced fiberglass for easy washdown. A variety of plumbing choices are available to match on-site resources including composting toilets for remote sites.

Hunter Knepshield facilities meet ADA requirements and can also be customized to suit specific needs. Options include additional space for storage, concession facilities, ticket booths, office space, and showers. Hunter Knepshield Company also offers the Hunter's Trail™ style of combination restroom/concession buildings and the Desert Trail™ style featuring a variety of newly available fibercement facings offering strength and durability.

Hunter Knepshield Company has provided innovative, affordable solutions for parks and recreation facilities for 35 years. In addition to modular public restrooms, Hunter Knepshield Company also manufactures pre-fab park shelters featuring clear span ceiling trusses for an open and airy look and feel.
